Yes

- Tissues
- Dirty & wet paper towels
- Cigarette butts
- Ceramics
- Hygiene products
- Greasy pizza boxes

No

- Batteries
- Glass
- Vapes
- Recyclables

BIO WASTE (Bokashi)

Yes

- Fruit & vegetable scraps
- Coffee grounds
- Tea bags
- Eggshells
- Food leftovers

No

- Liquids
- Large Bones
- Non-organic materials
- Stickers on fruit

Tip: Always close the lid tightly after use

SPECIAL WASTE (Other)

Batteries & Electronics

- Use the collection box in the admin office

Pfand Bottles

- Place bottles with the pfand symbol in the collection box

What about glass? Goes into the green containers outside of the office
Still unsure - Ask admin or LAVAzero team before disposing of an item

SUSTAINABLE PRINTING & PAPER USAGE GUIDE

The Checklist

To consider before printing: Print only when necessary (digital as first priority)

Printer Settings

- Double-sided printing
- Black & white (if colour can't be avoided)
- Eco/Draft mode

Reduce Paper Use

- Reduce margins (as low as readable)
- Use smaller font (10–11pt)
- Remove blank pages
- Print emails in compact format

Reuse Printed Paper

- Single-sided paper must NOT be discarded
  - Used for Drafts
  - Used for Notes
  - Used for Sketching
  - Used for Meetings
- Store in "Second-Life Paper" tray next to printer

Non-Recyclable Paper

- Food-stained paper
- Paper towels
- Laminated or plastic-coated paper

Confidential Documents

- Shred in secure bins only
- Not for Reuse

HEATING & VENTILATION GUIDE

Radiator Rules

Temperatures

- Set radiators to level 2–3 (approx. 18–19°C)
- Never use levels 4–5
- Remember: higher settings do not heat rooms faster—they only use more energy

Keep in mind

- Clear from furnitures
- Clear from boxes
- Clear from curtains
- Clear from coats & bags
- Remeber: blocked radiators waste heat and energy

Heating Up

- Before: put on a sweater
- Before: make a hot drink
- Before: move around
- The radiator is the last resort

End-of-the-day

- Set all radiators to level 1 (night-mode)

Ventilation
(Stoßlüften)

How to

1. Turn radiators OFF
2. Open windows fully
3. Create cross-ventilation where possible
4. Ventilate briefly
5. Close windows tightly
6. Return radiators to level 2–3

Ventilation Times

- Below 5°C → 3–5 minutes
- 5–15°C → 5–10 minutes
- Above 15°C → 10–20 minutes
- Repeat 2–4 times daily as needed

What not to do

- Leave windows tilted for long periods
- Heat rooms with windows open
- Leave radiators on during ventilation

ENERGY SAVING GUIDE

Lights

Rule: Last person out = Lights Off

Yes

- Se natural daylight whenever possible
- Keep blinds open unless glare is an issue
- Use task lighting instead of lighting entire roomsventilation

No

- Don't leave lights on in empty rooms

Computers & Devices

Rule: End of day = Shut down completely

Yes

- Enable energy-saving settings
- Set sleep mode after 5 minutes
- Turn off monitors when away
- Reduce screen brightness

No

- No screen savers
- No leaving computers on overnight

Meetings

Yes

- Meet in person when practical
- Share screens in meeting rooms instead of using multiple devices

Printing

Yes

- Double-sided printing only
- Turn printers and copiers off at the end of the day

Kitchen & Break Areas

Yes

- Use refrigerator eco-mode
- Run dishwashers only when full
- Turn coffee machines off after use

Reduce your Digital Footprint

Rule: Last person out = lights off

To do:

- Delete unnecessary files
- Avoid duplicate cloud storage
- Reduce large email attachments
- Archive instead of hoarding data

End-of-the-day energy sweep

Remember: Last person out completes the energy sweep

Before leaving:

- Lights OFF
- Monitors OFF
- Meeting room equipment OFF
- Non-essential devices unplugged
- Radiators checked

BIO-WASTE (BOKASHI)

Numbers of Collected Bokashi Bins

How to: Each time a Bokashi Bin is collected, record it by adding one line to the tally system
