YOUR SPACE

SET UP YOUR ENVIRONMENT

Make yourself comfortable but keep it healthy!

Adjust your chair and desk so your arms and legs are resting at 90-degree angles. Keep your screen about 50 to 80 cm away with the top edge at or below eye level and leave a little space in front of your keyboard to rest your hands.

LIGHT

IDEAL SIGHT CONDITIONS

A glaring screen is bad for your eyes.

Make sure you switch on the room lights if it gets too dark and use the curtains or blinds to block out harsh sunlight and annoying screen reflections. Good lighting keeps your eyes from getting tired during the day.

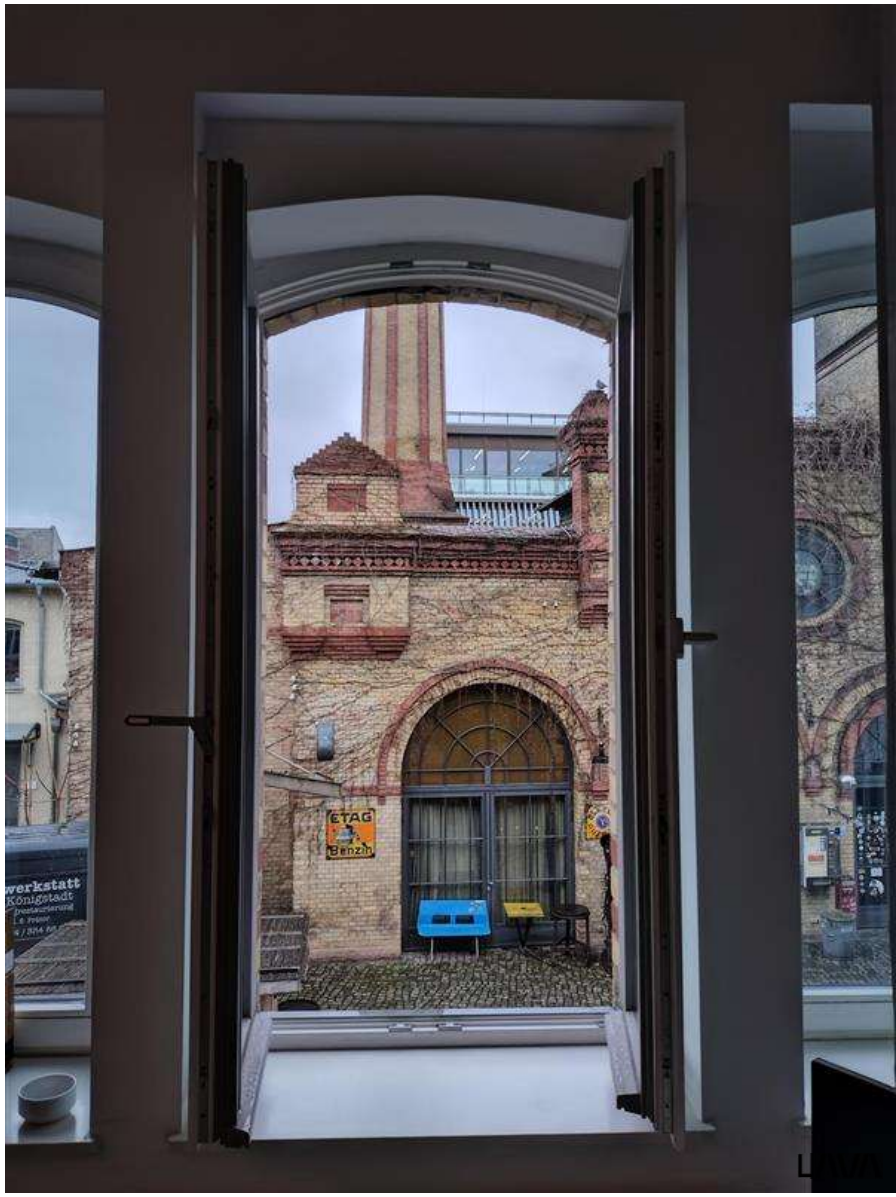

AIR

VENTILATE

Fresh air is an absolute game-changer for your energy levels.

Throw the windows wide open every once in a while, for a quick burst of fresh air — the classic German "Stoßlüften". It clears out the stale air, drops the CO2 levels, and keeps everyone feeling awake and healthy.

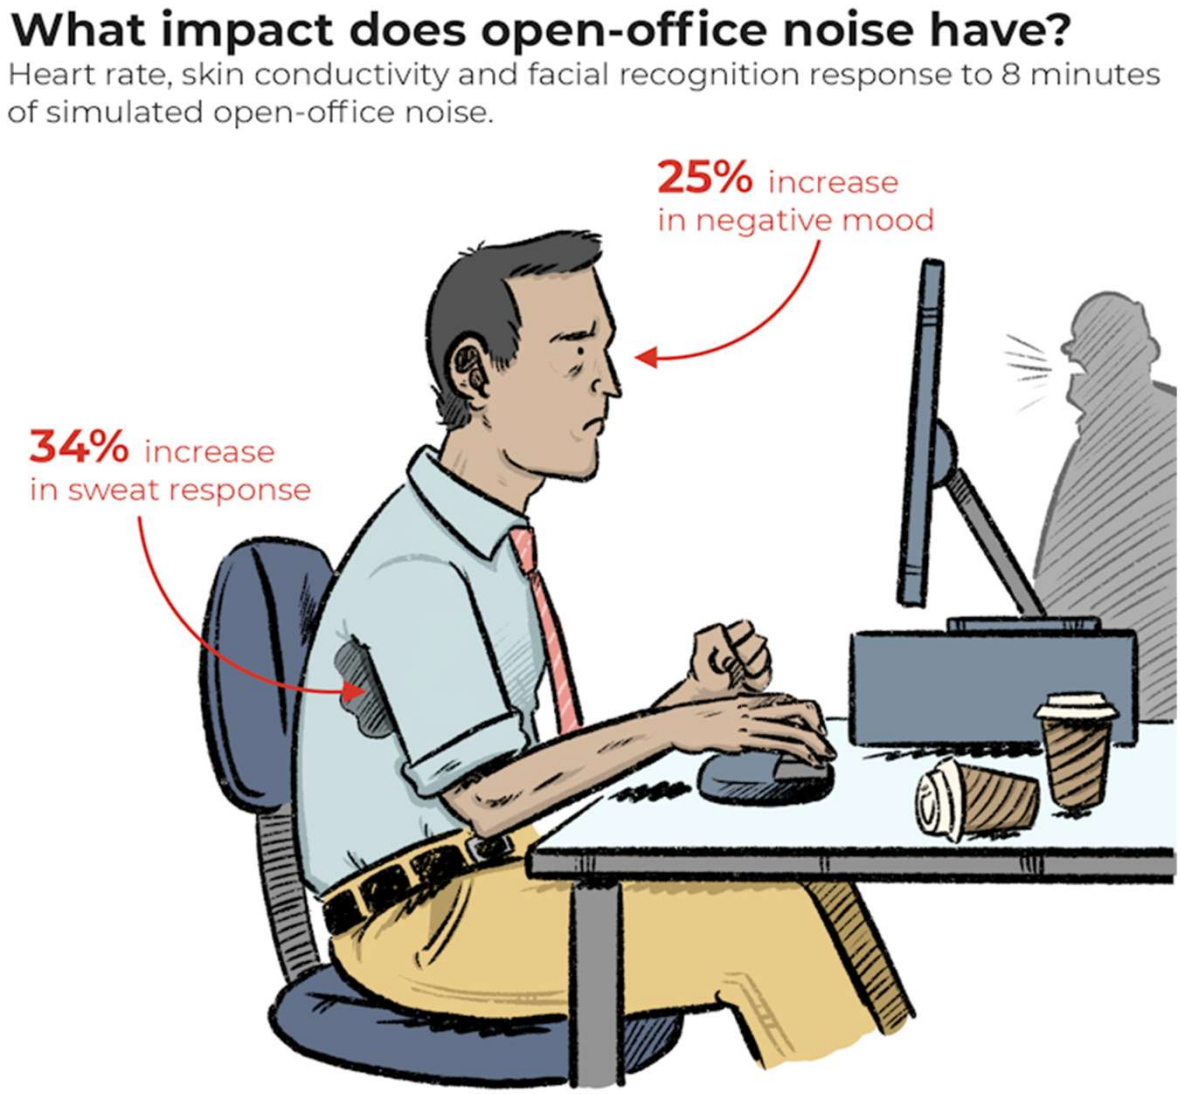

LAVA
HEALTH, LIFE & SAFETY

NOISE

BE CONSIDERATE

A quiet office helps everyone focus. If you need to take a call or have a longer chat, just use a phone booth or a meeting room.
Also, try to keep the volume down when you use the kitchen so you don't distract your teammates.

LAVA
HEALTH, LIFE & SAFETY

TRIP HAZARDS

STAY SAFE, KEEP THE ENVIRONMENT SAFE

The most common office accidents aren't from dramatic events, but from simply tripping over a loose laptop cable or walking into an open cabinet drawer.
Always use cable management channels, close your drawers immediately after grabbing what you need, and never, ever use your rolling swivel chair as a ladder to reach the top shelf— a ladder is in the green room.

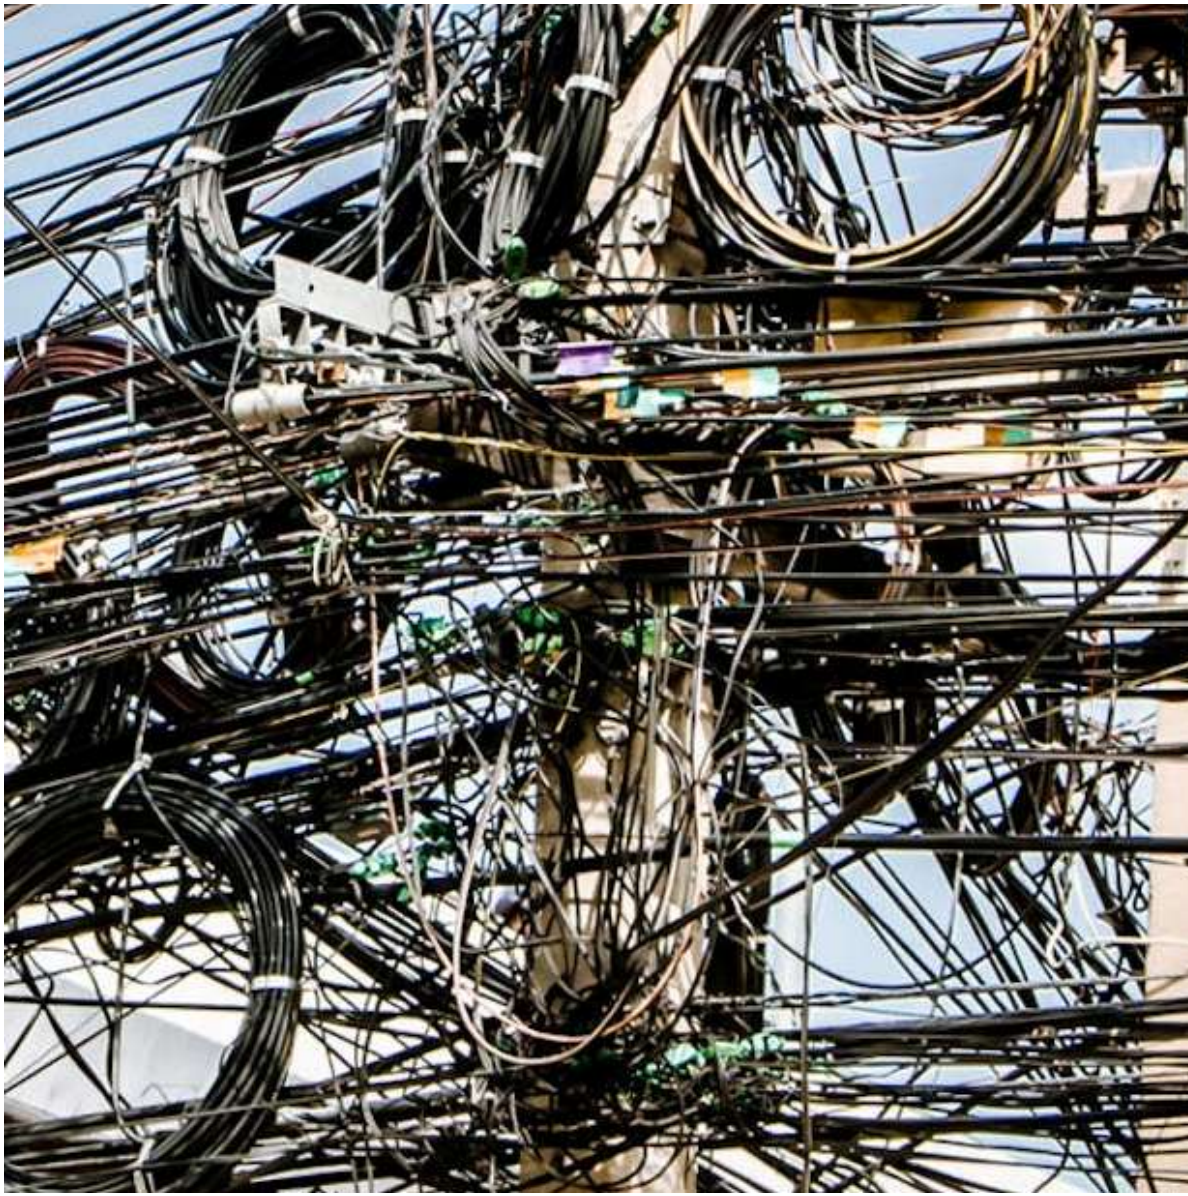

ELECTRICITY

ELECTRICAL DEVICES

LAVA makes sure the office electrical devices are safe.

Even though you are responsible, your devises are a fire hazard by regulation, and you can't have them in the office.

Also, never plug one power strip into another (no daisy-chaining!), as this overloads the circuits and can easily start a fire.

FIRST AID

HELP AND ASSIST

Accidents can happen.

You find the first aid kit above the printer, help you colleague or call an ambulance if needed (112).

Once you needed something from the first aid kit. **Inform Admin to have your accident logged** and to ensure what you took is replaced.

LAVA
HEALTH, LIFE & SAFETY

FIRE EXTINGUISHER

HELP AND ASSIST

Please make sure you checked the safety plans to know the position of the fire extinguisher closest to you.

Only get involved with what you feel safe. Your personal safety comes first!
There are also trained collogues Brandschutzhelfer, who can help you with questions.

Dial 112 for the fire brigade.

ESCAPE ROUTES

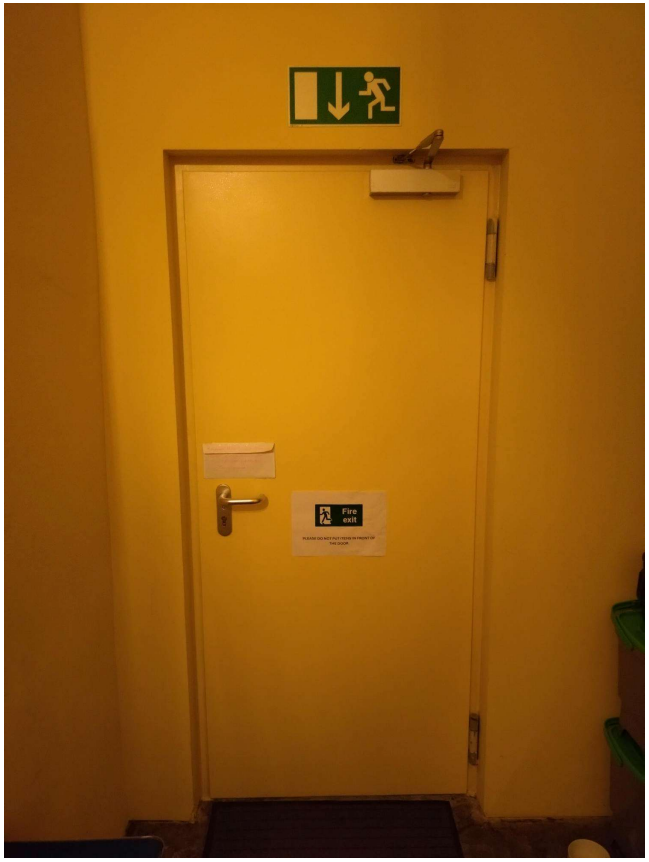

HELP AND ASSIST

Fire? Get to safety.

The main entrance, is the main escape – don’t use the elevator!
The alternative escape is in the back next to the kitchen. Make always sure no trash items, deliveries, anything blocks the escape routes.

Once outside wait for the headcount and double check if someone is missing. Get help for people who need assistance.

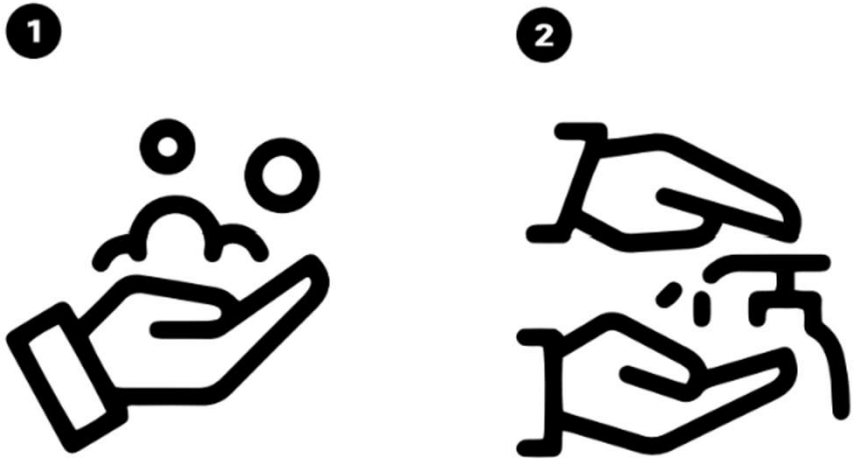

YOUR HANDS

CARE IS IMPORTANT

You use your hands all day.
Make sure before and after work you wash your hands with soap and use hand lotion, so they won't be too dry!

LAVA
HEALTH, LIFE & SAFETY

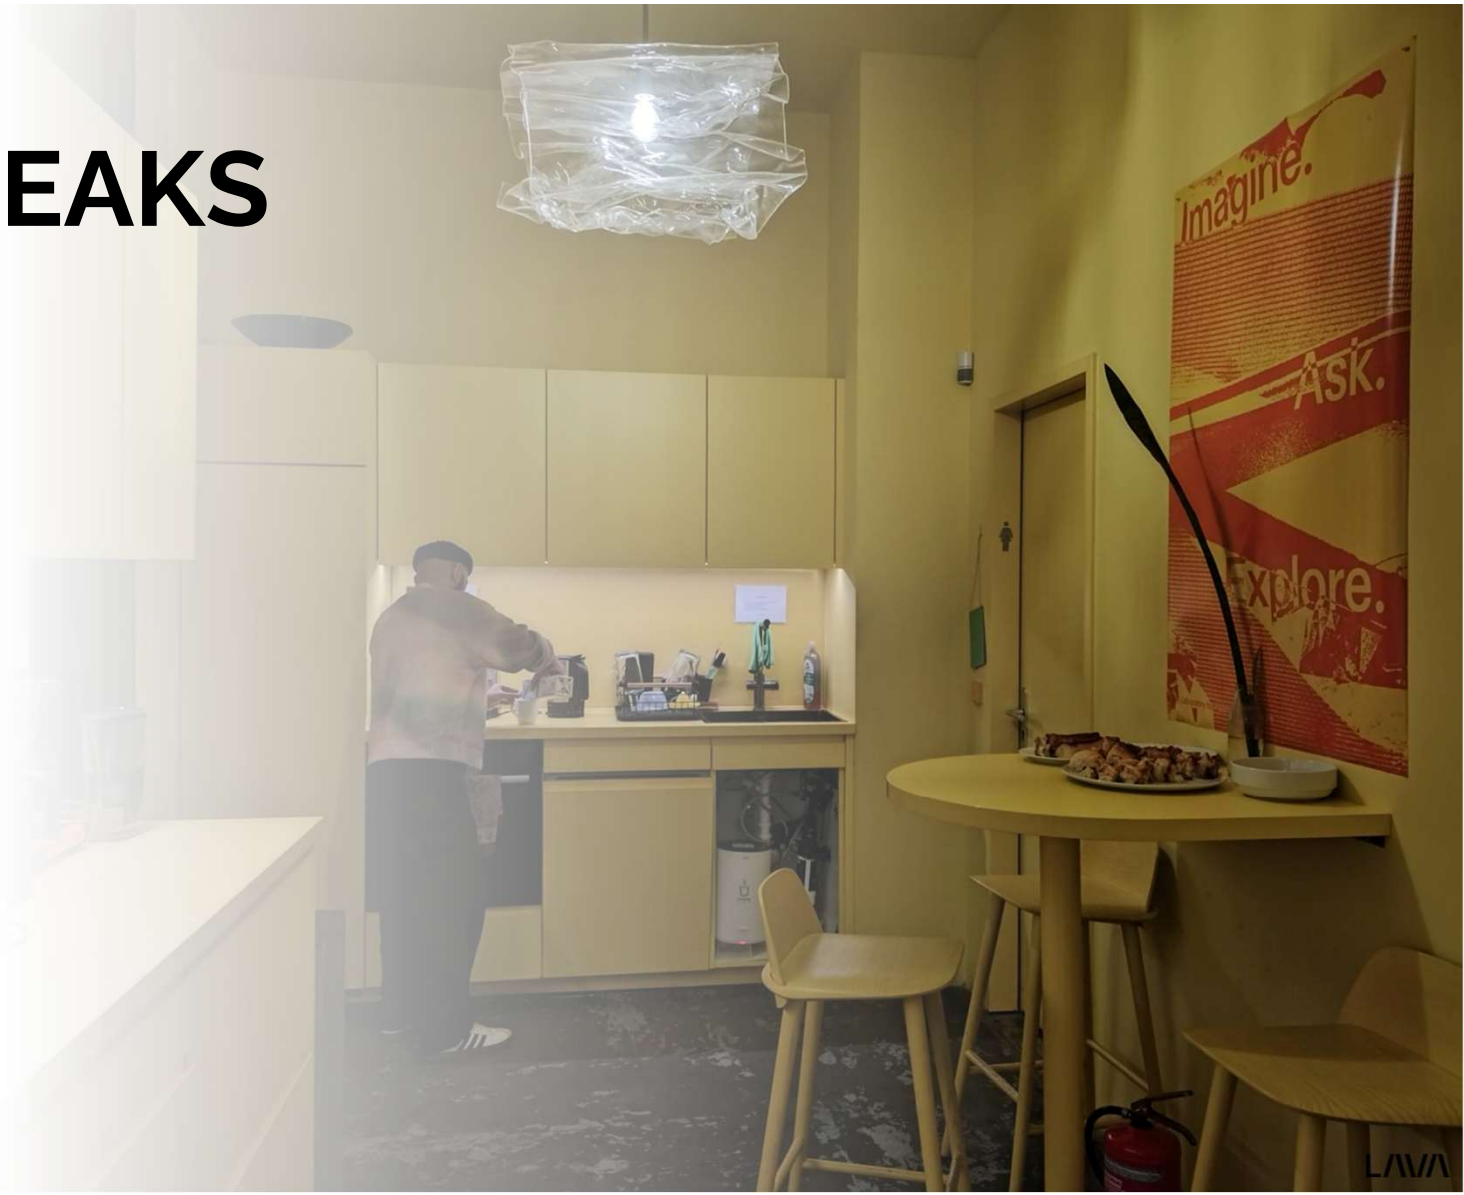

TAKING BREAKS

SELF CARE IS IMPORTANT

Don't forget to take a breather!

Stepping away from your screen, stretching, or just grabbing a coffee is super important for your well-being.

Regular breaks keep your mind sharp and your body happy, so please don't skip them.

TALK ABOUT ISSUES

STRESS PREVENTION - COMMUNICATION IS KEY

Mental health matters just as much as physical safety. If you're feeling overwhelmed, stressed out, or noticing something that's not working, speak up!

Mention problems early on helps fix things before they become a bigger problem. Communication is key!

Talk to your responsible lead and HR to help solving situations early on.

PREGNANT?
BREASTFEEDING?

If you are pregnant or breastfeeding, don't hesitate to inform your lead, director and HR as early as possible, so that any necessary adjustments can be made without delay.
The safety representative can help you to navigate and access the process.

LAVA wants to ensure that you and your child are protected throughout your pregnancy and breastfeeding period. Only in dialogue things can be adjusted to ensure a safe integration of pregnancy, breastfeeding and work life.

SAFETY REPRESENTATIVE

SICHERHEITSBEAUFTRAGTE

The safety representative can help you forward your concerns regarding workplace safety to the right people and assess hazards or deficiencies.

They are neither a shoulder to cry on nor an inspector, but a colleague who is happy to help ensure that work runs smoothly and safely.
Reach out to them with specific problems, near-misses, or questions — because workplace safety and health are a shared endeavour.

HEALTH, LIFE & SAFETY

FIRST AID

ERSTHELFER

The first aider is your first point of contact for injuries or medical emergencies at the workplace. They are neither a doctor nor a paramedic, but a colleague who has been specially trained to act quickly and correctly in the critical time before professional help arrives. Don't hesitate to approach them in the event of accidents, sudden illness, or any uncertainty around first aid — because a swift response can make all the difference in an emergency.

FIRE PREVENTION

BRANDHELFER

The fire safety assistant is your first point of contact for questions and concerns regarding fire prevention and emergency evacuation at the workplace. They are neither a firefighter nor a safety inspector, but a colleague who has been specially trained to identify fire hazards, ensure that escape routes remain clear, and guide everyone to safety in the event of an emergency. Don't hesitate to approach them if you notice potential fire risks, have questions about evacuation procedures, or are unsure where the nearest fire extinguisher or emergency exit is — because fire safety is a responsibility we all share.

PROFESSIONAL SUPPORT

APPOINTED SUPPORT FOR OCUPATIONAL HEALTH AND SAFETY

The occupational safety specialist *(Sicherheitsfachkraft)* and the company doctor *(Betriebsarzt)* are your expert contacts for more complex questions around workplace safety and health. They are neither supervisors nor fault-finders, but qualified professionals who advise the company and its employees on how to design workplaces safely, prevent work-related illness, and maintain long-term wellbeing. Reach out to them — through your manager or safety representative — if you have concerns about ergonomics, hazardous substances, persistent health issues related to your work, or questions about fitness for duty.

SICHERHEITSFACHKRAFT/ SAFETY OFFICER	Mr.	Renard Lehmann
ARBEITSMEDIZINISCHER DIENST / OFFICE DOCTOR	Mrs.	Judith Maria Wohlleben
